

```
public class TNode <T>{
    public T value;
    public TNode<T> left;
    public TNode<T> right;

    public TNode(T item){
        value = item;
        left = right = null;
    }

    public TNode(T item, TNode<T> left, TNode <T> right){
        value = item;
        this.left = left;
        this.right = right;
    }
}
```
